Deixis and Alignment - Fernando Zúñiga 2006-01-01
This book proposes a notion of inverse that differs from two widespread positions found in descriptive and typological studies (one of them restrictive and structure-oriented, the other broad and function-centered). This third stance put forward here takes both grammar and pragmatic functions into account, but it also relates the opposition between direct and inverse verbs and clauses to an opposition between deictic values, thereby achieving two advantageous goals: it meaningfully circumvents one of the usual analytic dilemmas, namely whether a given construction is passive or inverse, and it refines our understanding of the cross-linguistic typology of inversion. This framework is applied to the description of the morphosyntax of eleven Amerindian languages (Algonquian: Plains Cree, Miami-Illinois, Ojibwa; Kutenai; Sahaptian: Sahaptin, Nez Perce; Kiowa-Tanoan: Arizona Tewa, PicurÃs, Southern Tiwa, Kiowa; Mapudungun).

**Control as Movement** - Cedric Boeckx 2010-08-26
The Movement Theory of Control (MTC) makes one major claim: that control relations in sentences like 'John wants to leave' are grammatically mediated by movement. This goes against the traditional view that such sentences involve not movement, but binding, and analogizes control to raising, albeit with one important distinction: whereas the target of movement in control structures is a theta position, in raising it is a non-theta position; however the grammatical procedures underlying the two constructions are the same. This book presents the main arguments for MTC and shows it to have many theoretical advantages, the biggest being that it reduces the kinds of grammatical operations that the grammar allows, an important advantage in a minimalist setting. It also addresses the main arguments against MTC, using examples from control shift, adjunct control, and the control structure of 'promise', showing MTC to be conceptually, theoretically, and empirically superior to other approaches.

By Fire, By Water - Mitchell James Kaplan 2010-05-18
Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Santángel, chancellor to the court and longtime friend of the lusty King Ferdinand, has had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise,

and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in By Fire, By Water, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

**Voice and Inversion** - T. Givón 1994-05-30
This collection aims first to establish a structure-independent, language-independent definition of pragmatic voice, and more specifically then a universal functional definition of "inverse". The grammar and pragmatic function of the four major voice constructions — direct-active, inverse, passive, antipassive — are surveyed using narrative texts from 14 languages: Koyukon (Athabascan), Plains Cree (Algonquian), Chepang (Tibeto-Burman), Squamish and Bella Coola (Salish), Sahaptin (Sahaptian), Kutenai (isolate), Surinam Carib (Carib), Spanish and Greek (Indo-European), Korean, Maasai (Nilotic), Cebuano and Karao (Philippine). The comparative quantified study of pragmatic voice functions tests the validity of a universal functional definition of voice and in particular of "inverse". The cross-language comparison of grammatical structures that code the various voice functions then lays down the foundation for a non-trivial cross-language typology of "inverse".

**The Structure of Language** - Emma L. Pavey 2010-08-19
Most of the time we communicate using language without considering the complex activity we are undertaking, forming words and sentences in a split second. This book introduces the analysis of language structure, combining both description and theory within a single, practical text. It begins by examining words and parts of words, and then looks at how words work together to form sentences that communicate meaning. Sentence patterns across languages are also studied, looking at the similarities and the differences we find in how languages communicate meaning. The book also discusses how context can affect how we structure our sentences: the context of a particular language and its structures, the context of old and new information for us and our addressee(s), and the context of our culture.

*The Noun Phrase* - Jan Rijkhoff 2004
Jan Rijkhoff investigates noun phrases--linguistic constructions with the noun as central element--in a representative sample of the world's 6000 languages and proposes a semantic model to describe their underlying structure. Assuming no knowledge of any formal or functional theory of grammar, he shows that the noun phrase word order patterns of any language can be derived from three universal ordering principles and furthermore that these principles are elaborations of a general ordering strategy, by which elements that belong together semantically tend to occur together syntactically.

The Copy Theory of Movement - Norbert Corver 2007-06-27
This volume brings together papers which address issues regarding the copy theory of movement. According to this theory, a trace is a copy of the moved element that is deleted in the phonological component but is available for interpretation at L(ogical) F(orm). Thus far, the bulk of the research on the copy theory has mainly focused on interpretation issues at LF. The consequences of the copy theory for syntactic computation per se and for the syntax–phonology mapping, in particular, have received much less attention in the literature, despite its crucial relevance for the whole architecture of the model. As a contribution to fill this gap, this volume congregates recent work that deals with empirical and conceptual consequences of the copy theory of movement for the inner working of syntactic computations within the Minimalist Program, with special emphasis on the syntax–phonology mapping.

Historical Linguistics and the Comparative Study of African Languages - Gerrit J. Dimmendaal 2011-06-08
This advanced historical linguistics course book deals with the historical and comparative study of African languages. The first part functions as an elementary introduction to the comparative method, involving the establishment of lexical and grammatical cognates, the reconstruction of their historical development, techniques for the subclassification of related languages, and the use of language-internal evidence, more specifically the application of internal reconstruction. Part II addresses language contact phenomena and the status of language in a wider, cultural-historical and ecological context. Part III deals with the relationship between comparative linguistics and other disciplines. In this rich course book, the author presents valuable views on a number of issues in the comparative study of African languages, more specifically concerning genetic diversity on the African continent, the status of pidginised and creolised languages, language mixing, and grammaticalisation.
