www.elsevierdirect.com/9781856178181 with additional materials and links to websites and other resources for both students and lecturers

Management Strategies and Skills - Judith Dwyer 2013-05-17

Two additional chapters have been added to this resource in response to the training package updates in March 2015 that affected BSB42015 and BSB51915. These chapters are: Develop and use emotional intelligence and Leading and working with people. Looking for a blended digital solution? Get Connect! Connect is an online resource hosting an

abundance of interactive learning tools to create the ultimate learning experience for your students. Click here for more information. The new edition of Judith Dywers best-selling Management text has been updated and mapped to both Certificate IV in Frontline Management and Diploma of Management in the BSB07 Business Services Training Package. Written in plain English, with extensive use of succinct tables, diagrams and a full-colour internal design, this text conveys information to the reader easily and is ideal for visual learners. The text encourages learning with a logical pathway: the theory is presented, the reader is asked to reflect with Ask Yourself questions and then the student is engaged in practical applications with Apply Your Knowledge sections. This is an invaluable teaching tool for all management students and lecturers in the VET sector. Scope Management Strategies and Skills, 2e is mapped to both Certificate IV in Frontline Management and Diploma of Management in the BSB07 Business Services Training Package. [Strategic Safety Management in Construction and Engineering](#) - Patrick X. W. Zou 2015-03-26

Although the construction and engineering sector makes important contributions to the economic, social, and environmental objectives of a nation, it has a notorious reputation for being an unsafe industry in which to work. Despite the fact that safety performance in the industry has improved, injuries and fatalities still occur frequently. To address this, the industry needs to evolve further by integrating safety into all decision making processes. Strategic Safety Management in Construction and Engineering takes a broad view of safety from a strategic decision making and management perspective with a particular focus on the need to balance and integrate 'science' and 'art' when implementing safety management. The principles covered here include the economics of safety, safety climate and culture, skills for safety, safety training and learning, safety in design, risk management, building information modelling, and safety research methods and the research-practice nexus. They are integrated into a strategic safety management framework which comprises strategy development, implementation, and evaluation. Practical techniques are included to apply the principles in

the context of the construction and engineering industry and projects. Case studies are also provided to demonstrate the localised context and applications of the principles and techniques in practice.

Governance, Management and Development - David Hulme
2015-07-20

This fully revised edition of the same authors' Governance, Administration and Development is the ideal introduction to public management and the policy process in developing countries. With a new chapter on issues of law and order, it also covers current debates on civil society, aid and intervention, and the relationship of states and markets.

Management - Stephen P. Robbins 2014-09-01

The 7th edition of Management is once again a resource at the leading edge of thinking and research. By blending theory with stimulating, pertinent case studies and innovative practices, Robbins encourages students to get excited about the possibilities of a career in management. Developing the managerial skills essential for success in business—by understanding and applying management theories—is made easy with fresh new case studies and a completely revised suite of teaching and learning resources available with this text.

Management 7th Ed. - Stephen P. Robbins 2003

ITJEMAST 10(11) 2019 -

International Transaction Journal of Engineering, Management, & Applied Sciences & Technologies publishes a wide spectrum of research and technical articles as well as reviews, experiments, experiences, modelings, simulations, designs, and innovations from engineering, sciences, life sciences, and related disciplines as well as interdisciplinary/cross-disciplinary/multidisciplinary subjects. Original work is required. Article submitted must not be under consideration of other publishers for publications.

Fundamentals Of Management: Essential Concepts And Applications, 6/E
- Robbins 2009-09

Foundations of Management - Robbins & Bergman & Stagg

2008-11-11

FOUNDATIONS OF MANAGEMENT 3e has been written to address the needs of introductory management subjects that require an accessible and concise introduction. This streamlined text of 15 chapters covers the principal concepts of management to provide students with a solid foundation for understanding key issues. Management is a dynamic discipline and a textbook in this area must constantly undergo significant changes to prepare students to manage modern, ever-changing organisations within our transforming world. This new third edition builds on the success of its previous editions by exploring the new challenges that face managers today. New topics and features have been added to better reflect the field of management and to capture the excitement of this dynamic discipline. The text highlights six integrative topics throughout. These topics are managing for sustainability, globalisation, innovation, customer service, diversity and ethics. In particular, we believe the inclusion of managing for sustainability is an important recognition of the challenge that must be met by today's managers and organisations as they start to tackle the issue of global warming. This best-selling text is not a book that just describes management theories. In addition it includes many practical examples and cases, which illustrate the theories in action. As it successfully integrates the various functions of management, the book establishes a dialogue with managers from a variety of fields. This third edition continues to make management concepts meaningful and to excite readers about the possibilities of careers in management.

Compensation Management - Deb 2009

Encyclopedia of Management - Gale (Firm) 2009

Covers numerous topics in management theories and applications, such as aggregate planning, benchmarking, logistics, diversification strategy, non-traditional work arrangements, performance measurement, productivity measures, supply chain management, and much more.

Management: the Essentials - Stephen Robbins 2013-08-28

Robbins Management: The Essentials covers the concepts essential to

management in the 21st century in a fresh, lively format that's perfectly suited to a typical university semester. The second edition features new and in-depth coverage of sustainability, ethics and corporate social responsibility and new case studies from local and international businesses.

Essentials of Construction Project Management - Martin Loosemore 2003-10

This book has been written as a text and reference for project management courses in both undergraduate and postgraduate building construction management courses, and quantity surveying, architecture and civil engineering programs. Its focus is on the application of important issues of project management in the construction industry.

Managerial Perspectives on Intelligent Big Data Analytics - Sun, Zhaohao 2019-02-22

Big data, analytics, and artificial intelligence are revolutionizing work, management, and lifestyles and are becoming disruptive technologies for healthcare, e-commerce, and web services. However, many fundamental, technological, and managerial issues for developing and applying intelligent big data analytics in these fields have yet to be addressed.

Managerial Perspectives on Intelligent Big Data Analytics is a collection of innovative research that discusses the integration and application of artificial intelligence, business intelligence, digital transformation, and intelligent big data analytics from a perspective of computing, service, and management. While highlighting topics including e-commerce, machine learning, and fuzzy logic, this book is ideally designed for students, government officials, data scientists, managers, consultants, analysts, IT specialists, academicians, researchers, and industry professionals in fields that include big data, artificial intelligence, computing, and commerce.

A New History of Management - Stephen Cummings 2017-09-19

Existing narratives about how we should organize are built upon, and reinforce, a concept of 'good management' derived from what is assumed to be a fundamental need to increase efficiency. But this assumption is based on a presentist, monocultural, and generally limited view of

management's past. A New History of Management disputes these foundations. By reassessing conventional perspectives on past management theories and providing a new critical outline of present-day management, it highlights alternative conceptions of 'good management' focused on ethical aims, sustainability, and alternative views of good practice. From this new historical perspective, existing assumptions can be countered and simplistic views disputed, offering a platform from which graduate students, researchers, and reflective practitioners can develop alternative approaches for managing and organizing in the twenty-first century.

Business.today - Stephen P. Robbins 2001

Stephen P. Robbins is a best selling author of management and organizational behavior texts. In his new integrative, innovative introduction to business text, *business.today*, he adopts a reader-friendly conversational writing style. This new text is already receiving praise for its integrated emphasis on careers, e-business, technology, ethics, globalization, and other evolving issues. Robbins offers comprehensive coverage of traditional functions of business--marketing, management, accounting, finance, --but with a fresh real world format, covering the functions where it makes sense, just as a business person would encounter them. The innovative approach of business today reflects the immense changes that have occurred in business practices. Robbins demonstrates that the new world of business is about identifying opportunities, creating viable strategies, building relationships, and providing quality goods and services.

Tacit Knowledge in Organizational Learning - Busch, Peter 2008-01-31

Understanding the complexity of tacit knowledge has become increasingly important to the enhancement of organizational flow. *Tacit Knowledge in Organizational Learning* aims to advocate the need for ?human factor? consideration from a (tacit) knowledge capital point of view. *Tacit Knowledge in Organizational Learning* offers academicians and practitioners an illustration of the importance of tacit knowledge to an organization, presenting a means to measure and track tacit knowledge in individuals and recommendations on firm attributes and their ideal

utilization of the tacit knowledge resource.

Fundamentals of Building Contract Management - Thomas E. Uher 2009
Stripping contracts of their legal mystique and jargon, this reference offers essential information on the entire contract administration process. Divided into three sections, this easy-to-use guide covers potential issues from project inception to finish and includes sample contracts as well as an overview of the most recent statutory legislation. Comprehensive and practical, this handbook is an invaluable tool for both practitioners in the construction industry and students across Australia.

Handbook of Research on Management and Organizational History - Kyle Bruce 2020-04-24

Emerging from what was a somewhat staid sub-discipline, there is currently a battle for the soul of Management and Organizational History (MOH), at the centre of which is a widespread concern that much recent work has been more about how one should or might do history rather than actually doing historical work. If ever there was a time for a new volume on MOH, this is certainly it.

Innovation, Strategy and Risk in Construction - Martin Loosemore 2013-12-04

Innovation, Strategy and Risk in Construction integrates insights from business and government leaders with contemporary research, to help built environment professionals turn serendipity to their own advantage by building greater innovative and adaptive capacity into their operations. Accessible and full of practical examples, the book argues that traditional business strategies which seek to systematise innovation and eliminate uncertainty need to be balanced with more flexible approaches which acknowledge and harness uncertainty. The missing key to innovation, it is argued, is to turn serendipity into capability. The author proposes a simple model which allows managers to tap into the increasingly dynamic and interconnected nature of the construction industry. Innovation does not occur in isolation within individual firms, but through collaboration. Each stakeholder in the construction industry has a responsibility to drive innovation, and this book will be key reading

for consultants, contractors, subcontractors, suppliers and clients, as well as policy makers and all serious students of construction management.

Leading and Managing Health Services - Gary E. Day 2015-06-19

Leading and Managing Health Services: An Australasian Perspective provides a comprehensive overview of leadership and management in health services with a particular focus on the Australasian context. This text aims to help students develop leadership and management skills, and to critically analyse the issues they will face in practical health service settings. The book features a contemporary approach to learning, in line with the Health LEADS Australia framework which focuses on five key leadership attributes: Leads self, Engages systems, Achieves outcomes, Drives innovations and Shapes systems. Further, it offers a rich pedagogy both in the text and companion website. Chapters include case studies to provide examples of management and leadership issues in healthcare settings, and a wealth of reflective, short answer and multiple-choice questions to extend student learning. Written by respected Australian academics and industry experts, this text will equip health professional students with practical skills to successfully manage change and innovation.

Designing an Efficient Management System - Tanachart Raoprasert 2010-04-15

1. 1 Background of the Study: Efficiency in Cross-Cultural International Business Management Efficient business management is crucial in achieving corporate (national or international/multinational) goals such as higher value, comprehensiveness, corporate governance, etc. Efficient business management can be achieved by resolving agency problems existing among different stakeholders in corporations. In international business, agency problems may exist between managers, owners, staff, and other stakeholders who come from different cultures. Therefore, there is a need in designing efficient management of international business by influencing the factors (the convergence factors) which cause differences in the interests and cultures of different stakeholders. International business refers to all commercial transactions between two

or more nations. Because it comprises a large and growing portion of current world business practice, international business has received considerable attention in academic research (Daniels and Radebaugh 1998). International business differs in important ways from business conducted within national borders, and poses additional challenges to managers and investors in foreign countries (Mahoney et al. 1998). In this context, Black et al. (1999) state that effective management is increasingly recognized as a key determinant of success or failure, arguing that the success of international business in multinational companies depends most significantly on the quality of management systems (Stroh and Caligiuri 1998). As international business involves people from different cultures, every business function including managing a workforce, marketing output, and dealing with regulators, has the potential to involve cross-cultural problems (Zineldin 2007).

Managing Performance Improvement - Michael D. Tovey 2015-05-20

Increasing global competition, combined with shrinking budgets, are forcing managers to find new ways of operating. To compete successfully, companies must now use technology and resources (particularly human resources) to their full potential. Much of the research in the area of performance management has suggested that, while it has great potential to contribute dramatically to the bottom line, it rarely works. The third edition of *Managing Performance Improvement* looks at why performance systems fail, and explores the tools and techniques to overcome this failure. This best selling text provides practical, specific advice to managers and students enabling them to plan for, and then manage, performance improvement.

Interventionist Research in Accounting - Vicki Baard 2020-10-09

This book is the first comprehensive methodological guide for accounting researchers on Interventionist Research (IVR). It provides all the fundamental components needed for understanding what IVR is, and how to plan, design, and conduct legitimate intervention studies, which can endure the scrutiny of institutions and peer review. This text systematically opens the 'black box' of an alternative research paradigm seeking to contribute simultaneously to theory and practice, through

direct and collaborative engagement with organisations, practitioners, managers and professionals. It mobilises the production of innovative and theoretically grounded research for academe, and of practical relevance or usefulness and interest to the field of practice.

Interventionist Research in Accounting: A Methodological Approach unpacks current thinking on IVR to forge a confident path ahead for IVR through adopting a forward-thinking approach. This book recognises the remedial potential of IVR to address the research-practice-relevance gap in accounting research and deliberates the challenges of IVR in accounting. It addresses the design, development, and implementation of interventions, critical to solving real-world problems as well as guiding readers in planning the IVR project including budgetary and ethical aspects, utilising suitable research methods and data collection techniques, and establishing validity and reliability. Further, it offers guidance on selecting and managing the research team and recruiting, accessing, and retaining intervention participants; these two components are crucial to creating collaborative relationships required for effective intervention. This book is a guide serving as a valuable resource for accounting researchers conducting intervention studies, for doctoral and other research students undertaking accounting research, and academics working in universities and business schools or teaching courses in accounting and research methodology.

Communication for Business and the Professions: Strategies and Skills - Judith Dwyer 2012-10-15

The comprehensive how-to guide to preparing students for the demands they'll face on the job. Dwyer thoroughly addresses the new-media skills that employees are expected to have in today's business environment. Now titled *Communication for Business and the Professions: Strategies and Skills*, the fifth edition presents these technologies in the context of proven communication strategies and essential business English skills. With new and updated content on social media and technology, Dwyer provides comprehensive coverage of communication strategies and skills by linking theory and research with practical skills and examples. Dwyer believes in expanding our knowledge of what we can do to interact

effectively and provides us with working models to practise and refine how well we do it. This edition continues to provide a solid background in communication, stimulate critical thinking, and promote active learning through a variety of features and activities.

Encyclopedia of Information Science and Technology - Mehdi Khosrow-Pour 2009

"This set of books represents a detailed compendium of authoritative, research-based entries that define the contemporary state of knowledge on technology"--Provided by publisher.

Ethics, Values and Civil Society - Stephen Cohen 2013-05-02

This volume is a selection of papers from the 19th annual 'Australian Association for Professional and Applied Ethics' Conference. Topics covered include journalism ethics, organ donation, as well as an essay drawn from Daniel Wueste's keynote address on the conditions and implications of trust for the professions.

Work Stress Induced Chronic Diseases in Construction - Imriyas Kamardeen 2021-04-30

This book aims to fill a gap in the current construction health and safety research and discover new knowledge about work stress induced chronic diseases among construction industry professionals. In achieving these aims, the book investigates: the nature and extent of psychosocial stressors experienced by construction professionals, stress management tactics applied and the impact on mental health the prevalence and occurrence patterns of serious chronic conditions such as insomnia, obesity, musculoskeletal disorders and vision impairment aetiological pathways from job stressors through chronic diseases to job performance. While there are many studies, policies and regulations aiming to look after the health of construction workers, little attention is paid to construction professionals. By applying advanced analytical methods to data collected in a national survey of construction professionals in Australia, the author presents new scientific evidence which can be used to help establish equitable workers' compensation treatments and outcomes for construction professionals in line with other professions. Moreover, the research and analysis are underpinned by

theories and literature from public health and epidemiological disciplines in addition to literature from construction, and work health, safety and wellbeing domains. It is essential reading for any health policy makers and researchers in the fields of health and safety and construction management.

Sport Management - Russell Hoye 2018-01-16

Now available in a fully revised and updated fifth edition, *Sport Management: Principles and Applications* tells you everything you need to know about the contemporary sport industry. Covering both the professional and nonprofit sectors, and with more international material than any other introductory sport management textbook, it focuses on core management principles and their application in a sporting context, highlighting the unique challenges of a career in sport management. The book contains useful features throughout, including conceptual overviews, guides to further reading, links to important websites, study questions, and up-to-date case studies showing how theory works in the real world. It covers every core functional area of management, including: Strategic planning Financial management Organizational culture and design Human resource management Leadership and governance Marketing and sponsorship Performance management Sport and the media. The fifth edition includes expanded coverage of sport for development, analytics, monitoring and evaluation, ethics, risk management, sport and health, social media, sustainability, and other contemporary management issues. Complemented by a companion website offering additional resources for students and instructors, this is an ideal textbook for first and second year students in sport management degree programs and for business students seeking an overview of applied sport management principles.

Police Leadership and Management - Margaret Mitchell 2007

This volume presents the new contexts and challenges for contemporary police leaders and managers in the changing landscapes of policing. The governance of contemporary police organisations requires leaders and managers, even at the local level, to work in and understand complex social, political and organisational environments. The wide range of

topics in this collection explores what is changing, what is known about the impact of these changes and what leaders and managers now need to be able to do or anticipate as a consequence. Operational policing is no longer the militaristic singular activity it once was, but embraces new models of 'partnership' and 'community' to manage crime and disorder. Equally, while command and control models are still an essential of many aspects of policing, managing police officers and staff increasingly depends on their professional development and encouraging enthusiasm and innovation. Policing takes place under conditions of intense scrutiny from the media and from the community; and crime and disorder is the subject of much political debate. Each of these broad areas are addressed and present a surprising range of perspectives. The volume is aimed at every level of management and leadership in policing, researchers of policing and students of police management and leadership.

Leadership and Management: Theory and Practice - Kris Cole 2018-09-01

Leadership & Management: Theory & Practice by Kris Cole focuses on comprehensive coverage of the core management units within the Diploma of Leadership and Management BSB51915 and Certificate IV in Leadership and Management BSB42015. This market-leading textbook provides students with rigorous information while balancing the key topics with a practical approach, through real-life case studies, examples and problem-solving techniques. It uses everyday business terms and language, putting management in a context that makes it easy to understand for all types of learners. *Leadership & Management: Theory & Practice* enables students to strengthen skills in areas such as managing poor performance, being more directive, and solving problems permanently. It is noted for its application across industry sectors and different types of business.

Decision Management: Concepts, Methodologies, Tools, and Applications - Management Association, Information Resources 2017-01-30

The implementation of effective decision making protocols is crucial in any organizational environment in modern society. Emerging

advancements in technology and analytics have optimized uses and applications of decision making systems. Decision Management: Concepts, Methodologies, Tools, and Applications is a compendium of the latest academic material on the control, support, usage, and strategies for implementing efficient decision making systems across a variety of industries and fields. Featuring comprehensive coverage on numerous perspectives, such as data visualization, pattern analysis, and predictive analytics, this multi-volume book is an essential reference source for researchers, academics, professionals, managers, students, and practitioners interested in the maintenance and optimization of decision management processes.

Handbook of Research on Managerial Thinking in Global Business Economics - Dinçer, Hasan 2018-12-07

In a highly competitive global market, companies need to equip themselves with best practices and strategies to survive. Strategic management, innovative managerial thinking, and a clear decision-making process must be utilized to boost company performance and ultimately drive the company's success. The Handbook of Research on Managerial Thinking in Global Business Economics identifies the importance of strategic decision making in competitive environments and analyzes the impacts of managerial thinking on global financial economics. The content within this publication examines globalization, consumer behavior, and risk management. It is designed for researchers, academicians, policymakers, government officials, and managers, and covers topics centered on innovation and development within organizations.

Human Resource Management - David A. DeCenzo 1998-12-18

Over the past decade, management practice has gone through dramatic changes. Workforce diversity, downsizing, reengineering, total quality management, outsourcing, and rediscovering the importance of satisfying the customer, all has a significant impact on Human Resources. The new Sixth Edition of De Cenzo/Robbins' Human Resource Management features a current, real-world perspective that gives readers a crystal-clear picture of what today's HRM is really like.

Emphasizing the application of theory, the Sixth Edition carefully integrates real examples with the most up-to-date information available.

Managing Organizations for Sport and Physical Activity - Packianathan Chelladurai 2014-04-15

Managing Organizations for Sport and Physical Activity, fourth edition, presents a clear and concise treatment of managing organizations in sport and physical activity. The four functions of management--planning, organizing, leading, and evaluating--provide a general framework that represents the simplest and best approach for introducing readers to the intricacies of management. For each management function, Chelladurai presents relevant theories and their practical applications, citing those theoretical models that are most appropriate to the unique aspects of the sports industry. He uses the open systems perspective, placing organizations in the context of their environment and emphasizing the manager's role in adapting and reacting to changes in that environment. To apply theory to sport management practices, Chelladurai provides numerous examples from the fields of physical activity and sport, including professional sports, intercollegiate athletics, health and sports clubs, and recreation/fitness programs. New to the Fourth Edition A chapter on service quality, which describes the notion of quality in sport management services--from the local fitness center to the pro sport arena. It also discusses the measurement of service quality and the gaps in translating customer expectations into the desired service. A new feature providing "An Expert's View," which offers additional perspectives on relevant topics contributed by scholars who research and publish in a specific area. New sidebars on current topics relevant to the field of sport management; some examples include US Track and Field's SMART goal setting as well as genes and technology of leadership. Pedagogical Aids Developing Your Perspective. Thought-provoking questions ask learners to apply theoretical information to contexts relevant to them from their current experiences or in their future careers. Managing Your Learning. Key points from each chapter enhance comprehension. Strategic Concepts. Key terms lists provide for a shared vocabulary in discussing the major concepts of management. In

Brief. Short summaries of the important points in a section help crystallize concepts. To Recap. Brief boxes revisit key concepts discussed earlier in the book. Extensive references to journals, scholarly texts, and relevant websites.

Public Health Leadership - Louis Rowitz 2013

During the last twenty years, the interest in public health leadership has continued to increase with the need to strengthen the infrastructure of public health, the events of September 11, 2001, the health reform movement, scientific breakthroughs, the increasing role for primary care programs in the public health agenda, and the increasing deficit at the federal, state, and local level. Since the publication of the first edition in 2003, *Public Health Leadership: Putting Principles Into Practice* has become a standard reference for future and practicing public health leaders. In five parts, it explores the basic theories and principles of leadership and then describes how they may be applied in the public health setting. Leadership skills and competencies, as well as methods for measuring and evaluating leaders are all thoroughly covered. This new third edition is an exhaustive revision that now includes extensive coverage of the leadership skills and tools that are critical to managing public health emergencies. It also offers: * Updated exercises and case studies throughout * New chapter on Building Infrastructure, * New chapter on Accreditation, * New chapter on the Global Public Health Leader * New accompanying online Instructor's Manual with over 100 references on leadership, additional case studies, curriculum guide, toolkit, and additional exercises.

Protected Area Governance and Management - Graeme L. Worboys
2015-04-08

Protected Area Governance and Management presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently,

the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term, and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

Management - Stephen P. Robbins 2015

Robbins: bringing management theories to life. We live in dynamic times and a manager's job is continuously reshaped by a wide range of global, environmental and economic factors. Management students must be well prepared to work in modern, ever-changing organisations and teams. The 7th edition of *Management* is once again a resource at the leading edge of thinking and research. By blending theory with stimulating, pertinent case studies and innovative practices, Robbins encourages students to get excited about the possibilities of a career in management. Developing the managerial skills essential for success in business—by understanding and applying management theories—is made easy with fresh new case studies and a completely revised suite of teaching and learning resources available with this text.

ITJEMAST 10(8) 2019 -

International Transaction Journal of Engineering, Management, & Applied Sciences & Technologies publishes a wide spectrum of research and technical articles as well as reviews, experiments, experiences, modelings, simulations, designs, and innovations from engineering, sciences, life sciences, and related disciplines as well as interdisciplinary/cross-disciplinary/multidisciplinary subjects. Original

work is required. Article submitted must not be under consideration of other publishers for publications.
