*Malleus Maleficarum* - Heinrich Kramer 2018-03-29  
The *Malleus Maleficarum* is the best known and the most important treatise on witchcraft. It was written by the Catholic clergyman Heinrich Kramer and first

published in 1487. It was a bestseller, second only to the Bible in terms of sales for almost 200 years. The top theologians of the Inquisition at the Faculty of Cologne condemned the book as recommending unethical and illegal procedures, as well as being inconsistent with Catholic doctrines of demonology.

### **Convention européenne des droits de l'homme** - Rusen

Ergec 2014-06-05

L'ouvrage tend à étudier une matière qui a pris une place prépondérante dans l'ordre juridique des quarante-sept États membres du Conseil de l'Europe, qui recouvrent plus de huit cents vingt millions de personnes, en ce compris tous les États membres de l'Union européenne. La Convention européenne des droits de l'homme a, en effet, pénétré presque toutes les branches du droit. Il en est ainsi particulièrement de l'ordre juridique belge dont les autorités ont, dès les débuts,

témoigné d'une grande fidélité au droit de la Convention.

L'ouvrage se propose ainsi d'exposer ce droit à la lumière principalement de l'ordre juridique belge, tout en accordant la prééminence à la jurisprudence de la Cour européenne des droits de l'homme. La matière est abordée d'abord sous l'angle du droit matériel par une étude de tous les droits et libertés reconnus par la Convention et ses protocoles additionnels. La deuxième partie est consacrée au fonctionnement du système de protection, par l'analyse de ses aspects organiques et procéduraux. L'étude vise avant tout les praticiens du barreau et de la magistrature sans oublier les universitaires. Sa vocation internationale, révélée par la diffusion de la première édition, a également inspiré la deuxième édition. La jurisprudence est bien entendu privilégiée, mais la doctrine tant belge qu'étrangère n'est pas pour autant négligée malgré tout l'effort de sélectivité qu'impose l'abondance de la littérature.

Le lecteur trouvera également des développements théoriques lorsque cela a paru utile.

Milton Friedman 2020-11-17

One of TIME magazine's All-TIME 100 Best Nonfiction Books One of Times Literary Supplement's 100 Most Influential Books Since the War One of National Review's 100 Best Nonfiction Books of the Century One of Intercollegiate Studies Institute's 50 Best Books of the 20th Century How can we benefit from the promise of government while avoiding the threat it poses to individual freedom? In this classic book, Milton Friedman provides the definitive statement of an immensely influential economic philosophy—one in which competitive capitalism serves as both a device for achieving economic freedom and a necessary condition for political freedom. First published in 1962, Friedman's *Capitalism and Freedom* is one of the most significant works of economic theory ever written. Enduring in its eminence and esteem, it has sold nearly a million copies in English, has been translated into eighteen

languages, and continues to inform economic thinking and policymaking around the world. This new edition includes prefaces written by Friedman for both the 1982 and 2002 reissues of the book, as well as a new foreword by Binyamin Appelbaum, lead economics writer for the New York Times editorial board.

Valorization of Fruit Processing By-products - Charis Michel

Galanakis 2019-09-14

Valorization of Fruit Processing By-products

Covers the most recent advances in the field of fruit processing by-products following sustainability principles. The urgent need for sustainability within the food industry necessitates research to investigate the handling of by-products with another perspective, e.g. by adapting more profitable options. This book covers the latest developments in this particular direction. It promotes success stories and solutions that ensure the sustainable management of different fruit processing by-products (namely apple, apricot, avocado, Castanea sativa, citrus, date, mango, melon, passion fruit, pineapple, pink guava, pomegranate and watermelon), giving emphasis on the recovery of polyphenols, antioxidants and dietary fiber. Written by a team of experts in food processing and engineering, chemistry and food waste, this title is the

definite guide for all the involved partners, engineers, professionals and producers active in the field. Explores fruit processing techniques, scale up limitations and economical evaluation for each source of fruit processing by-product. Discusses the valorization of by-products derived from different fruits. Features the following fruits, including apple, avocado, chestnut, citrus, date, mango, melon and watermelon, passion fruit, pineapple, pink guava and pomegranate.

*MEG* - Peter Hansen

2010-07-01

Magnetoencephalography (MEG) is an exciting brain imaging technology that allows real-time tracking of neural activity, making it an invaluable tool for advancing our understanding of brain function. In this comprehensive introduction to MEG, Peter Hansen, Morten Kringelbach, and Riitta Salmelin have brought together the leading researchers to provide the basic tools for planning and executing MEG experiments, as well as analyzing and interpreting the resulting data. Chapters on the basics describe the fundamentals of MEG and its instrumentation, and provide guidelines for

designing experiments and performing successful measurements. Chapters on data analysis present it in detail, from general concepts and assumptions to analysis of evoked responses and oscillatory background activity. Chapters on solutions propose potential solutions to the inverse problem using techniques such as minimum norm estimates, spatial filters and beamformers. Chapters on combinations elucidate how MEG can be used to complement other neuroimaging techniques. Chapters on applications provide practical examples of how to use MEG to study sensory processing and cognitive tasks, and how MEG can be used in a clinical setting. These chapters form a complete basic reference source for those interested in exploring or already using MEG that will hopefully inspire them to try to develop new, exciting approaches to designing and analyzing their own studies. This book will be a valuable resource for

researchers from diverse fields, including neuroimaging, cognitive neuroscience, medical imaging, computer modelling, as well as for clinical practitioners.

### **Authority in the Modern**

**State** - Harold Joseph Laski  
1919

"This volume is some sort the sequel to a book on the problem of sovereignty which I published in March, 1917."--  
Preface.

**Global Slump** - David McNally  
2010-12-09

Global Slump analyzes the global financial meltdown as the first systemic crisis of the neoliberal stage of capitalism. It argues that—far from having ended—the crisis has ushered in a whole period of worldwide economic and political turbulence. In developing an account of the crisis as rooted in fundamental features of capitalism, Global Slump challenges the view that its source lies in financial deregulation. The book locates the recent meltdown in the intense economic restructuring that marked the recessions of

the mid-1970s and early 1980s. Through this lens, it highlights the emergence of new patterns of world inequality and new centers of accumulation, particularly in East Asia, and the profound economic instabilities these produced. Global Slump offers an original account of the “financialization” of the world economy during this period, and explores the intricate connections between international financial markets and new forms of debt and dispossession, particularly in the Global South. Analyzing the massive intervention of the world’s central banks to stave off another Great Depression, Global Slump shows that, while averting a complete meltdown, this intervention also laid the basis for recurring crises for poor and working class people: job loss, increased poverty and inequality, and deep cuts to social programs. The book takes a global view of these processes, exposing the damage inflicted on countries in the Global South, as well as the intensification of racism

and attacks on migrant workers. At the same time, Global Slump also traces new patterns of social and political resistance—from housing activism and education struggles, to mass strikes and protests in Martinique, Guadeloupe, France and Puerto Rico—as indicators of the potential for building anti-capitalist opposition to the damage that neoliberal capitalism is inflicting on the lives of millions.

**Youth and violent extremism on social media** - Alava, Séraphin 2017-12-04

**Life of St. Francis of Assisi** - Paul Sabatier 1894

**The Ordnance Department** - Constance Green 2015-07-02  
The U.S. Army fought World War II with materiel much of which was developed in the decade prior to our entry, particularly in the period following the German blitz in Poland. Our efforts to develop munitions to the point where our armies could cope on equal terms with those of potential

enemies are covered here in this, the first of three projected volumes on the history of the Ordnance Department in World War II. How well the Ordnance Department succeeded in matching the Germans in quality continues to be a matter of debate both within the Ordnance Department itself, and between the using arms and the Department. That the battle of quantity was won with the help of a superb industrial machine can hardly be denied. This volume, the result of diligent research by Dr. Constance McL. Green and her associates, should interest not only military men but also scientists, industrialists, and laymen in general. Among other things, it shows the urgent necessity of a directed, continuous, and intensive research program and the danger in failing to recognize and profit by developments abroad. Also shown is the inherent time interval between the drawing board and the production of the end item in quantity."

### **The Death and Life of Great American Cities - Jane Jacobs 2016-07-20**

Thirty years after its publication, *The Death and Life of Great American Cities* was described by *The New York Times* as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable,

readable, indispensable. The author has written a new foreword for this Modern Library edition.

*Power, Realism and*

*Constructivism* - Stefano

Guzzini 2013-03-20

Framed by a new and substantial introductory chapter, this book collects Stefano Guzzini's reference articles and some less well-known publications on power, realism and constructivism. By analysing theories and their assumptions, but also theorists following their intellectual paths, his analysis explores the diversity of different schools, and moves beyond simple definitions to explore their intrinsic tensions and fallacies. Guzzini's approach to the analysis of power - within and outside International Relations - provides the common theme of the book through which the theoretical state of the art in IR is reassessed. A novel analysis of power and the potential limits of realism and constructivism in International Relations, *Power, Realism and Constructivism* will be of

interest to students and scholars of international relations, international political economy, social and political theory, and the study of power.

*The Theory of Money and Credit* - Ludwig Von Mises  
2021-03-08

This must-read classic on currency and credit covers the three areas of key interest -- the nature of money, the value of money, and money and banking. Economist and philosopher Ludwig von Mises presents his "Theory of Money and Credit" by first looking at the nature and value of money, why there is a demand for money, and how it is used as currency. He goes on to explain the purchasing power of money and how it determines economic and monetary policy, often in a way that results in financial melt-downs. Never in modern history has there been a greater need for this book and others like it. All of its ideas and principles are coming true right before our eyes in today's economy and its problems.

*The Terms of Order* - Cedric J. Robinson 2016-03-09  
Do we live in basically orderly societies that occasionally

erupt into violent conflict, or do we fail to perceive the constancy of violence and disorder in our societies? In this classic book, originally published in 1980, Cedric J. Robinson contends that our perception of political order is an illusion, maintained in part by Western political and social theorists who depend on the idea of leadership as a basis for describing and prescribing social order. Using a variety of critical approaches in his analysis, Robinson synthesizes elements of psychoanalysis, structuralism, Marxism, classical and neoclassical political philosophy, and cultural anthropology in order to argue that Western thought on leadership is mythological rather than rational. He then presents examples of historically developed "stateless" societies with social organizations that suggest conceptual alternatives to the ways political order has been conceived in the West. Examining Western thought from the vantage point of a people only marginally

integrated into Western institutions and intellectual traditions, Robinson's perspective radically critiques fundamental ideas of leadership and order.

**Women Embracing Islam** - Karin van Nieuwkerk  
2006-08-01

Many Westerners view Islam as a religion that restricts and subordinates women in both private and public life. Yet a surprising number of women in Western Europe and America are converting to Islam. What attracts these women to a belief system that is markedly different from both Western Christianity and Western secularism? What benefits do they gain by converting, and what are the costs? How do Western women converts live their new Islamic faith, and how does their conversion

affect their families and communities? How do women converts transmit Islamic values to their children? These are some of the questions that *Women Embracing Islam* seeks to answer. In this vanguard study of gender and conversion to Islam, leading historians, sociologists, anthropologists, and theologians investigate why non-Muslim women in the United States, several European countries, and South Africa are converting to Islam. Drawing on extensive interviews with female converts, the authors explore the life experiences that lead Western women to adopt Islam, as well as the appeal that various forms of Islam, as well as the Nation of Islam, have for women. The authors find that while no single set of factors can explain why Western women are embracing Islamic faith traditions, some common motivations emerge. These include an attraction to Islam's high regard for family and community, its strict moral and ethical standards, and the rationality and spirituality of its

theology, as well as a  
disillusionment with

Christianity and with the  
unrestrained sexuality of so  
much of Western culture.
