OCD - Michael A. Tompkins 2012-01-01

When someone is diagnosed with obsessive-compulsive disorder (OCD), chances are they've been living with the symptoms for a long time.

People with OCD may have long felt embarrassed by their thoughts and behaviors, which may include fear of contamination, the need for symmetry, pathological doubt, aggressive thoughts, repeating behaviors, and obsessive cleaning. OCD: A Guide for the Newly Diagnosed helps readers understand how OCD works so they can develop better strategies for coping with their symptoms. This pocket guide

offers guidance for coping with the diagnosis itself, discusses stigmas related to OCD, and includes help for readers unsure of who they should tell about the diagnosis. Readers also learn about the most effective treatment approaches and easy ways to begin to manage their OCD symptoms. An OCD diagnosis can be a devastating event, or it can be a catalyst for positive change. Books in the Guides for the Newly Diagnosed series provide readers with all the tools they need to process a diagnosis in the healthiest way possible, and then move forward to manage their symptoms so that the disorder doesn't get in the way of living a fulfilling life. This book has been awarded The Association for Behavioral and Cognitive Therapies Self-Help Seal of Merit — an award bestowed on outstanding self-help books that are consistent with cognitive behavioral therapy (CBT) principles and that incorporate scientifically tested strategies for overcoming mental health difficulties. Used alone or in conjunction with

therapy, our books offer powerful tools readers can use to jump-start changes in their lives. This book is a part of New Harbinger Publications' Guides for the Newly Diagnosed series. The series was created to help people who have recently been diagnosed with a mental health condition. Our goal is to offer user-friendly resources that provide answers to common questions readers may have after receiving a diagnosis, as well as evidence-based strategies to help them cope with and manage their condition, so that they can get back to living a more balanced life. Visit www.newharbinger.com for more books in this series.

Neurobiology of Monotremes - Ken Ashwell

2013-12-01

Neurobiology of Monotremes brings together current information on the development, structure, function and behavioural ecology of the monotremes. The monotremes are an unusual and evolutionarily important group of mammals showing striking behavioural and physiological adaptations to their niches. They are the only mammals exhibiting electroreception (in the trigeminal sensory pathways) and the echidna shows distinctive olfactory specialisations. The authors aim to close the current gap in knowledge between the genes and developmental biology of monotremes on the one hand, and the adult structure, function and ecology of monotremes on the other. They explore how the sequence 'embryonic structure > adult structure > behaviour' is achieved in monotremes and how this differs from other mammals. The work also combines a detailed review of the neurobiology of monotremes with photographic and

diagrammatic atlases of the sectioned adult brains and peripheral nervous system of the short-beaked echidna and platypus. Pairing of a detailed review of the field with the first published brain atlases of two of the three living monotremes will allow the reader to immediately relate key points in the text to features in the atlases and will extend a universal system of brain nomenclature developed in eutherian brain atlases by G Paxinos and colleagues to monotremes.

Millimeter Wave Optical Dielectric Integrated Guides and Circuits - Shibani K. Koul 1997-04-04

This much-needed reference equips electrical engineers, designers, and researchers in the microwave industry with comprehensive, up-to-date information on the theoretical principles and practical applications of dielectric integrated guides and circuits.

Literacy, Home, and School - Peter Hannon 1995

Presents new ways of thinking about parental involvement in the teaching of reading and writing aimed at both researchers and practitioners. It relates the recent growth of involvement to broader considerations of the nature of literacy and historical exclusion of parents from the curriculum.

NMR-Spectroscopy: Modern Spectral Analysis - Ursula Weber 2008-11-21

The state-of-the-art in NMR spectral analysis. This interactive tutorial provides readers with a comprehensive range of software tools and techniques, as well as the necessary theoretical knowledge required to analyze their spectra and obtain the correct NMR parameters. Modern Spectral Analysis provides expert guidance, by presenting efficient strategies to extract NMR parameters from measured spectra. A database of selected spectra and modern, powerful WIN-NMR software designed by Bruker are provided on the enclosed CD-ROM. The programs provided are 1 D WIN-NMR, WIN-DAISY, WIN-

DR and WIN-DYNAMICS, and direct data exchange between all these programs is possible. Readers are shown how they can obtain maximum structural information from their 1 D NMR spectra with time-saving computer assistance. Practical problems that can occur and their solutions are discussed at length using clear, easy-to-follow examples. Both homo- and heteronuclear and first- and second-order spin systems are demonstrated. Moreover, relaxation analysis, nuclear Overhauser effects and magnetic site exchange are all covered in this hands-on guide to NMR spectral analysis.

Ford Madox Ford and the Misfit Moderns - R. Hawkes 2012-01-01

Ford Madox Ford is a major modernist writer,

yet many of his works do not conform to our assumptions about modernism. Examining ways in which he, alongside other 'misfit moderns', undermines 'stabilities' we expect from novels and memoirs, this book poses questions about the nature of narrative and the distinction between modernism and modernity.

Foyle's Philavery - Christopher Foyle 2007

The word 'philavery' was specially invented to describe this book - a collection of words chosen simply on the grounds of their aesthetic appeal. Some of these words appeal because of their aptness, some for their obscurity, some for their euphony, and some for their quirkiness. As a collection they will be a delight to all word lovers.

Making Money Talk - J. Anderson Little 2007

This book describes models and techniques to help mediators deal with the peculiar problems that arise in traditional bargaining. The following subjects are covered: the realities of negotiating about money; skills of the mediator;

ethical standards in the mediation of civil litigation; and charting settlement conference proposals.
