**National Education Technology Plan** - Arthur P. Hershaft 2011

Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to

higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration required to solve the most challenging problems of our time. The National Education Technology

Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

**Informal Transport in the Developing World**

- Robert Cervero 2000

*Working in America* - Paul Osterman 2002-08-23

A study of the changing face of the American labor market. The American labor market faces many deep-rooted problems, including persistence of a large low-wage sector, worsening inequality in earnings, employees' lack of voice in the workplace, and the need of employers to maximize flexibility if they are to survive in an increasingly competitive market. The impetus for this book is the absence of a

serious national debate about these issues. The book represents nearly three years of deliberation by more than 250 people drawn from business, labor, community groups, academia, and government. It traces today's labor-market policy and laws back to the New Deal and to a second wave of social regulation that began in the 1960s. Underlying the current system are assumptions about who is working, what workers do, and how much job security workers enjoy. Economic and social changes have rendered those assumptions invalid and have resulted in mismatches between labor institutions and efficient and equitable deployment of the workforce, as well as between commitments to the labor market and family responsibilities. This book should launch a national dialogue on how to update our policies and institutions to catch up with the changes in the nature of work, in the workforce, and in the economy.

*Workforce Education* - William B. Bonvillian  
2021-02-02

A roadmap for how we can rebuild America's working class by transforming workforce education and training. The American dream promised that if you worked hard, you could move up, with well-paying working-class jobs providing a gateway to an ever-growing middle class. Today, however, we have increasing inequality, not economic convergence. Technological advances are putting quality jobs out of reach for workers who lack the proper skills and training. In *Workforce Education*, William Bonvillian and Sanjay Sarma offer a roadmap for rebuilding America's working class.

They argue that we need to train more workers more quickly, and they describe innovative methods of workforce education that are being developed across the country.

*The Practice of Radiology Education* - Teresa van  
Deven 2009-10-13

The practice of radiology education: challenges and trends will provide truly helpful guidance for those of you involved in teaching and training in radiology. The goal of this book is ultimately to improve patient care. As a companion piece to the first book radiology education: the scholarship of teaching and learning, this book focuses on applying the concepts at a practical level that can be applied flexibly within educational programs for radiology residents and fellows in any medical imaging learning environment. This book focuses on the application of scholarship in terms of the "dissemination of useful, testable and reproducible information to others." It links educational theory with practice and for those of you who wish to explore educational practice further, a number of chapters suggest additional readings and resources. The publication is timely and congruent with one of the most important twenty-first century trends in medical education: the move from amateurism to

professionalism in teaching. In the past, medical schools and other health professions' training institutions have been criticized for their resistance to the adoption of the science of medical education. Very few of us learned how to teach as medical students and most of us have our teaching responsibilities thrust on us with little preparation. The award of a basic medical degree was assumed to carry with it basic teaching expertise, unfortunately an unwarranted assumption in some cases.

**A Kind of Passport** - Anne DiPardo 1993

Focusing on culturally diverse students and the adequacy of efforts to help them succeed in college, this book presents an ethnographic study of the basic writing course, a central element of the adjustment between academe and nontraditional students. The research site, pseudonymously called Dover Park University for purposes of this account of the study, was a typical, predominantly white, middle-class institution newly committed to the goal of

increasing services to, and enrollment of, minorities, but with uneven and unremarkable resources and with a faculty and administrators who were well intentioned but sometimes weighed down by entrenched attitudes and precedents. The first part of the book discusses the background and design of the study. The second part discusses the nature of the larger social contexts in which the basic writing adjunct program was situated, and the nature of the more immediate social contexts (at the level of the English department) as perceived from the points of view of the writing program directors, adjunct component coordinators, and instructors. The third section examines four focal students' backgrounds, their attempts to adjust to college life, their struggles with writing, and perceptions of the small-group component of their basic writing course. The concluding section of the book reflects upon the complexities of designing effective programs to serve the needs of linguistically and culturally

diverse basic writers, and discusses the more general ramifications of one campus's often troubled attempts to provide equitable opportunities for all. Interview questions are attached. (Contains 135 references.) (RS).

**Monetizing Your Data** - Andrew Roman Wells  
2017-02-27

Transforming data into revenue generating strategies and actions Organizations are swamped with data—collected from web traffic, point of sale systems, enterprise resource planning systems, and more, but what to do with it? Monetizing your Data provides a framework and path for business managers to convert ever-increasing volumes of data into revenue generating actions through three disciplines: decision architecture, data science, and guided analytics. There are large gaps between understanding a business problem and knowing which data is relevant to the problem and how to leverage that data to drive significant financial performance. Using a proven methodology

developed in the field through delivering meaningful solutions to Fortune 500 companies, this book gives you the analytical tools, methods, and techniques to transform data you already have into information into insights that drive winning decisions. Beginning with an explanation of the analytical cycle, this book guides you through the process of developing value generating strategies that can translate into big returns. The companion website, [www.monetizingyourdata.com](http://www.monetizingyourdata.com), provides templates, checklists, and examples to help you apply the methodology in your environment, and the expert author team provides authoritative guidance every step of the way. This book shows you how to use your data to: Monetize your data to drive revenue and cut costs Connect your data to decisions that drive action and deliver value Develop analytic tools to guide managers up and down the ladder to better decisions Turning data into action is key; data can be a valuable competitive advantage, but only if you

understand how to organize it, structure it, and uncover the actionable information hidden within it through decision architecture and guided analytics. From multinational corporations to single-owner small businesses, companies of every size and structure stand to benefit from these tools, methods, and techniques; Monetizing your Data walks you through the translation and transformation to help you leverage your data into value creating strategies.

The New Division of Labor - Frank Levy  
2012-11-26

As the current recession ends, many workers will not be returning to the jobs they once held--those jobs are gone. In The New Division of Labor, Frank Levy and Richard Murnane show how computers are changing the employment landscape and how the right kinds of education can ease the transition to the new job market. The book tells stories of people at work--a high-end financial advisor, a customer service

representative, a pair of successful chefs, a cardiologist, an automotive mechanic, the author Victor Hugo, floor traders in a London financial exchange. The authors merge these stories with insights from cognitive science, computer science, and economics to show how computers are enhancing productivity in many jobs even as they eliminate other jobs--both directly and by sending work offshore. At greatest risk are jobs that can be expressed in programmable rules--blue collar, clerical, and similar work that requires moderate skills and used to pay middle-class wages. The loss of these jobs leaves a growing division between those who can and cannot earn a good living in the computerized economy. Left unchecked, the division threatens the nation's democratic institutions. The nation's challenge is to recognize this division and to prepare the population for the high-wage/high-skilled jobs that are rapidly growing in number--jobs involving extensive problem solving and interpersonal communication. Using detailed

examples--a second grade classroom, an IBM managerial training program, Cisco Networking Academies--the authors describe how these skills can be taught and how our adjustment to the computerized workplace can begin in earnest.
