*Sports-Related Concussions in Youth* - National Research Council  
2014-02-04

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of

sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which

these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

*Innovations in Transportable Healthcare Architecture* - Stephen Verderber 2015-10-05

*Innovations in Transportable Healthcare Architecture* is the first book to examine the ways that healthcare architecture can provide better assistance in disaster-stricken communities. Aimed at architects and other professionals working across the disaster relief sector, it provides: An overview of the need for rapid response healthcare facilities; Global case studies which demonstrate real examples; Historical perspectives on redeployables used in past military and civilian contexts; Analysis of the advantages, challenges, and opportunities associated with offsite, premanufactured healthcare facilities and their component systems, for permanent installations or reuse on multiple sites; Planning and design considerations for transportable offsite-built healthcare architecture; State-of-the-art research on pop-up clinics, truck-based configurations, ISO container-based outpatient clinical and trauma care centres, and modularized facilities for contemporary military and civilian contexts. *Innovations in Transportable Healthcare Architecture* will be an invaluable reference source for architects, disaster mitigation planners, design and engineering practitioners, non-governmental medical aid organizations (NGOs), governmental health ministries, and policy specialists across the spectrum of disciplines engaged in disaster mitigation and the provision of healthcare in medically underserved communities globally.

**US Marine Corps Pacific Theater of Operations 1941-43** - Gordon L.

Rottman 2013-02-20

The outbreak of World War II set in motion a massive expansion of the United States Marine Corps, leading to a 24-fold increase in size by August 1945. This book is the first of several volumes to examine the Corps's meteoric wartime expansion and the evolution of its units. It covers the immediate pre-war period, the rush to deploy defense forces in the war's early months, and the Marines' first combat operations on Guadalcanal, New Georgia, and Bougainville. It focuses on the 1st, 2d, and 3d Marine Divisions (MarDivs) and the provisional 1st, 2d, and 3d Marine Brigades (MarBdes).

The Untold Experiences of a Navy Corpsman - C. Gilbert Lowery 2011-04

**Overdue and Presumed Lost** - Martin Sheridan 2013-03-21

The USS Bullhead was the last American naval vessel lost in World War II. This is the submarine's history - from launch to disappearance - as told by the only war correspondent allowed on a wartime submarine patrol. Narrow escapes from floating mines, diving to avoid enemy aircraft, and a daring sortie to rescue three badly hurt Army survivors of a downed B-52 crew are just a few of the adventures recounted. Trained as a feature writer, author Martin Sheridan knew how to share his experiences, the intangible spirit of camaraderie and sense of danger, as well as the humorous and poignant incidents of everyday living. First published in 1947, the narrative is based on a journal kept by the author during the Bullhead's first war patrol in March-April 1945 and supplemental information from official Navy reports. It captures the perilous undersea war in the Pacific as only a first-hand account can, supported by a unique collection of period photographs.

**Combined Action Platoons In The Vietnam War:** - Major Ian J. Townsend 2015-11-06

In Vietnam, the III Marine Amphibious Force used Combined Action

Platoons (CAPs) as one part of its operational level counterinsurgency campaign. These platoons provided security assistance to the South Vietnamese Popular Forces and civic action to the village based population. To measure the operational effectiveness and the current relevancy of this specific type of combined action their activities are evaluated against current Army counterinsurgency doctrine. This monograph demonstrates the value of the CAPs as one element in the context of a counterinsurgency campaign, and how this form of combined action may serve as a tool for Army commanders conducting operational art in future. Independent operations are not the future of American warfare in the 21st Century. Contemporary thought about the future of American warfare is that the "conventional forces of the United States Army will have an enduring requirement to build the security forces and security ministries of other countries." Some form of combined action will be a required in American military operations for the foreseeable future. Given this truth, CAPs provide a practical historical example of a combined action technique that can serve as a tool for the future.

**Cinema's Military Industrial Complex** - Haidee Wasson 2018-01-23

The vast, and vastly influential, American military machine has been aided and abetted by cinema since the earliest days of the medium. The US military realized very quickly that film could be used in myriad ways: training, testing, surveying and mapping, surveillance, medical and psychological management of soldiers, and of course, propaganda. Bringing together a collection of new essays, based on archival research, Wasson and Grieverson seek to cover the complex history of how the military deployed cinema for varied purposes across the the long twentieth century, from the incipient wars of US imperialism in the late nineteenth century to the ongoing War on Terror. This engagement includes cinema created and used by and for the military itself (such as training films), the codevelopment of technologies (chemical, mechanical, and digital), and the use of film (and related mass media) as a key aspect of American "soft power," at home and around the world. A

rich and timely set of essays, this volume will become a go-to for scholars interested in all aspects of how the military creates and uses moving-image media.

*Good Tuberculosis Men* - Carol R. Byerly 2013

In 1917, as the United States prepared for war in Europe, Army Surgeon General William C. Gorgas recognized the threat of Mycobacterium tuberculosis to American troops. What the Army needed was some "good tuberculosis men." Despite the efforts of the nations best "tuberculosis men," the disease would become a leading cause of World War I disability discharges and veterans benefits. The fact that tuberculosis patients often experienced cycles in which they recovered their health and then fell ill again challenged government officials to judge the degree to which a person was disabled and required government care and support. This book tracks the impact of tuberculosis on the US Army from the late 1890s, when it was a ubiquitous presence in society, to the 1960s when it became a curable and controllable disease.

**U.S. NAVY HOSPITAL CORPSMAN & USMC FIELD MEDICAL SERVICE TECHNICIAN FMST TACTICAL COMBAT CASUALTY TCCC 2013 & 2014 STUDENT HANDBOOK** - 2017-01-01

The FIELD MEDICAL SERVICE TECHNICIAN provides medical and dental services for personnel in field units; also provides technical and administrative assistance to support the mission and functions of the Navy and Marine Corps field units. Maintains organizational level AMAL's and ADAL's. Assists in the procurement and distribution of supplies and equipment for field use and combat areas. Maintains field treatment facilities. Renders first aid and emergency medical and dental treatment to unit personnel/combatants. Coordinates and performs medical evacuation procedures. Ensures observance of field sanitary measures and preventive measures in specialized warfare. Conducts first aid and health education training programs. COURSE DESCRIPTION: During this 8 week course, you will have a mix of classroom and field training. Emphasis is placed on learning field medicine by using the principles of Tactical Combat Casualty Care (TCCC). This includes familiarization with USMC organization and procedures, logistics, and administrative support in a field environment. Additionally, training will include general military subjects, individual and small unit tactics, military drills, physical training/conditioning, and weapons familiarization with the opportunity to fire the rifle. Completion of FMST results in the student receiving Navy Enlisted Classification HM-8404.

**Model Rules of Professional Conduct** - American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's

purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**Trauma Care Pre-Hospital Manual** - Ian Greaves 2018-12-07

This new book provides evidence based guidelines for the immediate clinical management of major trauma. It has been written by clinicians with many years of trauma experience, and endorsed as authoritative by Trauma Care (UK). The UK now has highly effective trauma systems. Clinical developments include the introduction of damage control resuscitation, tranexamic acid, blood product resuscitation, novel hybrid resuscitation and an emphasis on the control of major external haemorrhage as part of a new ABCDE approach. Consequently, more individuals with major trauma are surviving than ever before. Optimal pre-hospital care is essential for improved survival rates and reduced morbidity.

*ABC of Prehospital Emergency Medicine* - Tim Nutbeam 2013-09-23  
Prehospital Emergency Medicine (PHEM) is a new and evolving field within Prehospital Care and involves the delivery of safe prehospital critical care to seriously ill or injured patients, and safe transfer to or between hospitals. It covers a broad range of medical and traumatic conditions, interventions, clinical providers and physical environments. ABC of Prehospital Emergency Medicine is the first text to provide a comprehensive overview of this field and with an international team of expert authors is essential reading to anyone involved in the delivery of Prehospital Emergency Medicine and Prehospital Care. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

*Abyss Deep* - Ian Douglas 2013-10-29

New York Times bestselling author Ian Douglas's virtuosic Star Corpsman series proves one thing: The Marines are still the toughest sons of guns in the galaxy. As Bravo Company defuses a hostage crisis on an orbiting mining station, Navy Corpsman Elliot "Doc" Carlyle not only

saves the lives of a wounded Marine and two extraterrestrial friendlies—he averts a terrorist strike intended to kill billions. His reward? Deployment on a recon mission into the darkest depths known to man. Abyss Deep is a foreboding ocean planet torn by extremes: boiling storm world on one side, unbroken glacier on the other. Humans established a research colony there to study the planet's giant sea serpents—but the colony has gone ominously silent. When Carlyle's team arrives, they discover a vessel belonging to a warlike alien species hovering above the atmosphere. But below the ice lurks a mystery so chilling it will make even Elliot Carlyle's blood run cold.

[Fundamentals of Military Medicine](#) - Francis G. O'Connor 2019-06-03  
An introduction to military medicine for medical students new to the military. Military medicine is the application of medical art and science in a military setting for the benefit of the military organization through optimal care of the combatant. Topics include: the history of military medicine, leadership, the management and treatment of trauma and mass casualties in frequently austere field and ship environments; the humane clearing of the battlefield; vaccines and protection against exotic global pathogens—both manmade and naturally occurring; unique psychological stressors of war; biodefense against chemical and nuclear weapons; facilitating return to duty; and the eventual return and reintegration home, of valuable human resource This "first-of-its-kind textbook", offers both authoritative scholarship and the experience of high-level medical officers for the new medical officer within any of the armed services, ranging from medical, surgical, nursing, dental, veterinary, and more. It also provides health education and research for the military health professional(s) deployed to save enlisted military lives and helps to educate medical students with military medical practices

and leadership.

[Military Medicine in Iraq and Afghanistan](#) - Ian Greaves 2018-10-03

Many, if not most, of the recent improvements in trauma care in civilian practice have developed from military experience. The British Defence Medical Services have been recognised as providers of exemplary health care. Although there will be an emphasis on trauma, this book also captures lessons from internal medicine and infectious disease, ethics (for example dealing with detainees - a particularly controversial subject), human factors, mental health issues and rehabilitation. Military Medicine provides the evidence and context for these innovations, and its unique and important account will be of interest to both military and civilian practitioners alike.

[Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course](#)

(BRC) References -

Over 5,300 total pages .... MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air- Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas

by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes.
