Math A - Lawrence S. Leff 2004

The old Sequential Math exams are gradually being phased out of the New York State Regents curriculum. A brand new and more rigorous exam, Regents Math A, is already being offered as replacement for all of the former Sequential Math I and the first half of Sequential Math II exams, and soon will replace them entirely. Barron's brand new Regents Exams and Answers book for this subject covers all topics on the new Math A exam. It also presents all seven of the actual New York State Regents Math A exams that have been issued to date. All exams appear in this book with answers to all questions. These ever popular guides include study tips, test-taking strategies, score analysis charts, and other valuable features. They are an ideal source of practice and test preparation. The detailed answer explanations make each exam a practical learning experience.

On the Same Track - Carol Corbett Burrell
2015-03-17

A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms What would happen if a school eliminated the "tracks" that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a "watered-down" curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn't increase learning for the minority and low-income students who are overrepresented in

low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn't have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare

them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burris shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today's popular reforms emanate from the same "sort and select" mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential.
