Air Quality, 2014 - 2014

"TRB's Transportation Research Record: Journal of the Transportation Research Board, No. 2427 consists of 9 papers that examine ecospeed-controlled vehicles at signalized intersections; the attributes and value of ecologically friendly route choices; network-wide vehicle energy consumption and ecorouting; fuel economy of ecodriving programs in Manila, Philippines, and Tokyo, Japan; and preliminary testing and evaluation of ecolane applications. This issue also explores a model for optimizing ecodriving at signalized intersections; input data for a motor vehicle emissions simulator; incorporation of carbon dioxide emissions and associated fuel

consumption in the Texas A & M Transportation Institute Urban Mobility Report; and traffic emissions and air quality near roads in dense urban neighborhoods."--Publisher's description.

Innovation and Entrepreneurship - Charles H. Matthews 2015-03-12

This book presents a new model, the competency framework, for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation and new venture creation capability. Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation, management and cross-disciplinary classes, such as design thinking. Presented in a modular format, Innovation & Entrepreneurship informs the future direction of people and technology, as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation and the competency categories are

the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

Korean - Jaehoon Yeon 2019-06-25

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

Success Is in Your Sphere: Leverage the Power of Relationships to Achieve Your Business Goals - Zvi Band 2019-04-05

A proven step-by-step approach to leveraging the unique power of relationships to your best business advantage. Our professional relationships are the most important asset we have when it comes to growing our careers and our businesses. Most people think of this as “networking.” But in today’s hyperconnected market, the most cost-effective and high-return route to new, repeat, and referral business is through our existing networks, not through adding more social media “friends” and “connections.” This transformative guide from relationship marketing expert Zvi Band shows you how to deepen your personal connections to achieve your professional goals—using the CAPITAL strategy of relationship-building techniques:

- Consistency: develop good habits to form stronger relationships
- Aggregate: build a personal database of professional contacts
- Prioritize: order your network based on who can help
- Investigate: collect intelligence on the people who are most important to you
- Timely Engagement: create a steady cadence in your outreach
- Adding Value: offer

more than a simple follow-up

- Leverage: execute more effectively

The basic idea behind these powerful tools is simple: Effective relationship building is not about acquiring new contacts. It’s about strengthening your connections with the key people who will help you drive your business forward. Through a combination of personal research, best practices, and case studies, Band provides a prescriptive strategy you can customize and follow every day. You’ll find cost-effective, high-yield tools that can be implemented via social media and other digital platforms. You’ll discover the best-kept secrets of the most popular companies in the world—and time-saving techniques for achieving similar results with your own customers. Most important, you can make the most of what you already have: the simple human connections that make everything worthwhile. In business, as in life, it all comes down to the quality of your relationships. When the right people are on your side, Success Is in Your Sphere.

The New Polymath - Vinnie Mirchandani 2010
Prepare for a world of compound innovation which blends 3, 5, 10 strands of infotech, greentech, biotech and healthtech to solve the "Grand Challenges" our world faces - and the more routine ones. Polymath is the Greek word for a Renaissance person like Leonardo Da Vinci or Ben Franklin who excels in many disciplines. The New Polymath is an enterprise which has learned to amalgamate 3, 5, 10 strands of technology - infotech, cleantech, healthtech, nanotech, biotech - to create compound new products and to innovate internal processes. Anchors around case studies on innovations and creative.

The New Technology Elite - Vinnie Mirchandani 2012-02-28

How-to guidance for optimizing incumbent technologies to deliver a better product and gain competitive advantage. Their zip codes are far from Silicon Valley. Their SIC codes show retail, automobile or banking. But industry after industry is waking up to the opportunity of "smart" products and services for their increasingly tech-savvy customers. Traditionally technology buyers, they are learning to embed technology in their products and become technology vendors. In turn, if you analyze Apple, Google, Amazon, Facebook, Twitter and eBay, you marvel at their data centers, retail stores, application ecosystems, global supply chains, design shops. They are considered "consumer" tech but have better technology at larger scale than most enterprises. The old delineation of technology buyer and vendor is obsolete. There is a new definition for the technology elite - and you find them across

industries and geographies. The 17 case studies and 4 guest columns spread through *The New Technology Elite* bring out the elite attributes in detail. Every organization will increasingly be benchmarked against these elite - and soon will be competing against them. Contrasts the productivity that Apple, Google and others have demonstrated in the last decade to that of the average enterprise technology group Reveals how to leverage what companies have learned from Google, Apple, Amazon.com, and Facebook to your company's advantage Designed for business practitioners, CEOs, CFOs, CIOs, technology vendors, venture capitalists, IT consultants, marketing executives, and policy makers Other titles by Vinnie Mirchandani: *The New Polymath: Profiles in Compound-Technology Innovations* If you're looking to encourage technology innovation, look no further. *The New Technology Elite* provides the building blocks your company needs to become innovative through incumbent technologies.

Outside Insight - Jorn Lyseggen 2017-10-12
Is your business looking out? The world today is drowning in data. There is a treasure trove of valuable and underutilized insights that can be gleaned from information companies and people leave behind on the internet - our 'digital breadcrumbs' - from job postings, to online news, social media, online ad spend, patent applications and more. As a result, we're at the cusp of a major shift in the way businesses are managed and governed - moving from a focus solely on lagging, internal data, toward analyses that also encompass industry-wide, external data to paint a more complete picture of a brand's opportunities and threats and uncover forward-looking insights, in real time. Tomorrow's most successful brands are already embracing *Outside Insight*, benefitting from an information advantage while their competition is left behind. Drawing on practical examples of transformative, data-led decisions made by brands like Apple, Facebook, Barack Obama and many more, in *Outside Insight*, Meltwater CEO Jorn Lyseggen illustrates the future of corporate decision-making and offers a detailed plan for business leaders to implement *Outside Insight* thinking into their company mindset and processes.

SAP Nation - Deal Architect 2014-12-05

From its humble beginnings in Germany, SAP skyrocketed to become a global powerhouse and the technology backbone for tens of thousands of enterprises. The economy around it grew even faster, and "SAP Nation" now approaches the GDP of Ireland in size. This book documents both trajectories, based on decades of research and interviews of hundreds of customers, market analysts and competitors. SAP's influence has declined in the last decade, as enterprises invest in cloud, social, analytical and mobile technologies and in custom development of "systems of advantage" in their products, channels and business models. Yet, shockingly, customer spending in SAP Nation remains stubbornly high. The model in the book estimates post-recession investment at more than one trillion dollars (yes). This book brings out loudly the voice of SAP customers as they cope with this runaway economy. Twenty-five case studies showcase a spectrum of strategies - some are "ring fencing" SAP with Workday, others are switching maintenance to Rimini Street, yet others are in-sourcing, while still others are evaluating newer SAP products like HANA and acquisitions like Concur. Part root cause analysis and part strategy manual, this book is a must-read for anyone with interest in SAP - as customer, employee, partner, investor or competitor. It is a fast-paced look at decades of what SAP has done well, and what it could have done better. Executives everywhere, even those in non-SAP settings, will benefit from the

strategies described in the book to migrate inefficient back-office IT dollars to front-office innovation.

The Hardmen: Legends and Lessons from the Cycling Gods - The Velominati 2017-11-07
Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. .

Code Halos - Malcolm Frank 2014-04-07

Harness "Code Halos" to gain competitive advantage in the digital era Amazon beating Borders, Netflix beating Blockbuster, Apple beating Kodak, and the rise of companies like Google, LinkedIn, and Pandora are not isolated or random events. Today's outliers in revenue

growth and value creation are winning with a new set of rules. They are dominating by managing the information that surrounds people, organizations, processes, and products—what authors Malcolm Frank, Paul Roehrig, and Ben Pring call Code Halos. This is far beyond "Big Data" and analytics. Code Halos spark new commercial models that can dramatically flip market dominance from industry stalwarts to challengers. In this new book, the authors show leaders how digital innovators and traditional companies can build Code Halo solutions to drive success. The book: Examines the explosion of digital information that now surrounds us and describes the profound impact this is having on individuals, corporations, and societies; Shows how the Crossroads Model can help anticipate and navigate this market shift; Provides examples of traditional firms already harnessing the power of Code Halos including GE's "Brilliant Machines," Disney's theme park "Magic Band," and Allstate's mobile devices and analytics that transform auto insurance. With reasoned insight, new data, real-world cases, and practical guidance, Code Halos shows seasoned executives, entrepreneurs, students, line-of-business owners, and technology leaders how to master the new rules of the Code Halo economy.

Green Economy and Trade - United Nations Environment Programme 2013

By addressing the critical nexus between a green economy and international trade, this report responds to the calls made by world leaders at Rio+20 for supporting the transition to a green economy that contributes to poverty eradication and sustainable development. Acknowledging international trade as an engine for development and sustained economic growth, this report provides an overview and examples on how the transition to a greener economy can create sustainable trade opportunities for developing countries. It also points to the main challenges related to the realisation of these opportunities and sets out enabling conditions for trade to contribute to environmental objectives while advancing economic and social development.

Financial Trading and Investing - John L. Teall 2018-03-21

Financial Trading and Investing, Second Edition,

delivers the most current information on trading and market microstructure for undergraduate and master's students. Without demanding a background in econometrics, it explores alternative markets and highlights recent regulatory developments, implementations, institutions and debates. New explanations of controversial trading tactics (and blunders), such as high-frequency trading, dark liquidity pools, fat fingers, insider trading, and flash orders emphasize links between the history of financial regulation and events in financial markets. New sections on valuation and hedging techniques, particularly with respect to fixed income and derivatives markets, accompany updated regulatory information. In addition, new case studies and additional exercises are included on a website that has been revised, expanded and updated. Combining theory and application, the book provides the only up-to-date, practical beginner's introduction to today's investment tools and markets. Concentrates on trading, trading institutions, markets and the institutions that facilitate and regulate trading activities Introduces foundational topics relating to trading and securities markets, including auctions, market microstructure, the roles of information and inventories, behavioral finance, market efficiency, risk, arbitrage, trading technology, trading regulation and ECNs Covers market and technology advances and innovations, such as execution algo trading, Designated Market Makers (DMMs), Supplemental Liquidity Providers (SLPs), and the Super Display Book system (SDBK)

Business Intelligence and Performance Management - Peter Rausch 2013-02-15
During the 21st century business environments have become more complex and dynamic than ever before. Companies operate in a world of change influenced by globalisation, volatile markets, legal changes and technical progress. As a result, they have to handle growing volumes of data and therefore require fast storage, reliable data access, intelligent retrieval of information and automated decision-making mechanisms, all provided at the highest level of service quality. Successful enterprises are aware of these challenges and efficiently respond to the dynamic environment in which their business operates. Business Intelligence (BI) and Performance Management (PM) offer solutions to these challenges and provide techniques to enable effective business change. The important aspects of both topics are discussed within this state-of-the-art volume. It covers the strategic support, business applications, methodologies

and technologies from the field, and explores the benefits, issues and challenges of each. Issues are analysed from many different perspectives, ranging from strategic management to data technologies, and the different subjects are complimented and illustrated by numerous examples of industrial applications. Contributions are authored by leading academics and practitioners representing various universities, research centres and

companies worldwide. Their experience covers multiple disciplines and industries, including finance, construction, logistics, and public services, amongst others. Business Intelligence and Performance Management is a valuable source of reference for graduates approaching MSc or PhD programs and for professionals in industry researching in the fields of BI and PM for industrial application.
