Kitson's Irish War - David Burke 2021-10-05
The British government has taken steps to halt the prosecution of soldiers responsible for the deaths of civilians in Northern Ireland, most of whom had no connection to paramilitary activities. These killings were part of a ruthless

dirty war that commenced in 1970 when Brigadier Frank Kitson, a counter-insurgency specialist, was sent to Northern Ireland. Kitson had spent decades in Britain's colonies refining old, and developing new, techniques which he applied in Northern Ireland. He became the architect of a clandestine war, waged against Nationalists while ignoring Loyalist atrocities. Kitson and his colleagues were responsible for: •

The establishment of the clandestine Military Reaction Force (MRF) which carried out assassinations on the streets of Belfast of suspected IRA members; • They unleashed the most violent elements of the Parachute Regiment [1 Para] to terrorise Nationalist communities which, they adjudged, were providing support for the Official and Provisional IRA; • Spreading black propaganda designed to undermine Republican but not Loyalist paramilitary groups; • Deployed psychological warfare techniques, involving the torture of internees; • Sent Kitson's 'Private Army' - Support Company of 1 Para - to Derry where they perpetrated the Bloody Sunday massacre. The British Widgery and Saville inquiries did not hold Kitson and his elite troops accountable for Bloody Sunday. Kitson's Irish War lays bare the evidence they discounted: Kitson's role in the events leading up to and surrounding that massacre; evidence from a deserter from 1 Para who joined the IRA; a deceitful MI5 agent; a

courageous whistle blower whom the British state tried to discredit, and much more, all of which points to a motive for the attack on the Bogside. This book unlocks the some of the key secrets of the Dirty War that the British government is still determined to cover-up.

Sister Mine - Tawni O'Dell 2008-05-06

Shae-Lynn Penrose drives a cab in a town where no one needs a cab—but plenty of people need rides. A former police officer with a closet full of miniskirts, a recklessly sharp tongue, and a tendency to deal with men by either beating them up or taking them to bed, she has spent years carving out a life for herself and her son in Jolly Mount, Pennsylvania, the tiny coal-mining town where she grew up. Two years ago, five of Shae-Lynn's miner friends were catapulted to media stardom when they were rescued after surviving four days trapped in a mine. As the men struggle to come to terms with the

nightmarish memories of their ordeal, along with the fallout of their short-lived celebrity, Shae-Lynn finds herself facing harsh realities and reliving bad dreams of her own, including her relationship with her brutal father, her conflicted passion for one of the miners, and the hidden identity of the man who fathered her son. When the younger sister she thought was dead arrives on her doorstep, followed closely by a gun-wielding Russian gangster, a shady New York lawyer, and a desperate Connecticut housewife, Shae-Lynn is forced to grapple with the horrible truth she discovers about the life her sister's been living, and with one ominous question: Will her return result in a monstrous act of greed or one of sacrifice? Tawni O'Dell's trademark blend of black humor, tenderness, and a keen sense of place is evident once again as Shae-Lynn takes on past demons and all-too-present dangers.

The Intelligence War against the IRA -

Thomas Leahy 2020-03-31

The exposure of two senior republicans as informers for British intelligence in 2005 led to a

popular perception that the IRA had 'lost' the intelligence war and was pressurised into peace. In this first in-depth study across the entire conflict, Thomas Leahy re-evaluates the successes and failures of Britain's intelligence activities against the IRA, from the use of agents and informers to special-forces, surveillance and electronic intelligence. Using new interview material alongside memoirs and Irish and UK archival materials, he suggests that the IRA was not forced into peace by British intelligence. His work sheds new light on key questions in intelligence and security studies. How does British intelligence operate against paramilitaries? Is it effective? When should governments 'talk to terrorists'? And does regional variation explain the outcome of intelligence conflicts? This is a major contribution to the history of the conflict and of why peace emerged in Northern Ireland.

The Naked Sky of Freedom - Acharya Prashant
2016-01-01

There is no chain that binds us physically. What is it then that causes us to freeze when life throws at us an opportunity? What stops you from freely, wholeheartedly embracing life as it comes to you? Philosophical or spiritual literature have always talked of Freedom/Moksha/Mukti etc. However, very few writers or speakers have been able to simplify these essentials to the level of understanding and application. The writer has remarkably, delivered the essence of freedom and its

meaning and relevance in our lives. With every chapter, he breaks you free of the shackles that clutch you, giving you the understanding that nothing stops you from flying high in the Naked Sky of Freedom.
