Reforming Public Health in Occupied Japan, 1945-52 - Christopher Aldous 2011-12-02

Whilst most facets of the Occupation of Japan have attracted much scholarly debate in recent decades, this is not the case with reforms relating to public health. The few studies of this subject largely follow the celebratory account of US-inspired advances, strongly associated with Crawford Sams, the key figure in the Occupation charged with carrying them out. This book tests the validity of this dominant narrative,

interrogating its chief claims, exploring the influences acting on it, and critically examining the reform's broader significance for the Occupation and its legacies for both Japan and the US. The book argues that rather than presiding over a revolution in public health, the Public Health and Welfare Section, headed by Sams, recommended methods of epidemic disease control and prevention that were already established in Japan and were not the innovations that they were often claimed to be. Where high incidence of such endemic diseases as dysentery and tuberculosis reflected serious socio-economic problems or deficiencies in sanitary infrastructure, little was done in practice to tackle the fundamental problems of poor water quality, the continued use of night soil as fertilizer, and pervasive malnutrition. Improvements in these areas followed the trajectory of recovery, growth, and rising prosperity in the 1950s and 1960s. This book will be important reading for anyone studying Japanese History, the History of Medicine, Public Health in Asia, and Asian Social Policy.

Exhibit A - Guy Bourdin 2001

Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation, but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism, subversion, and, as Cecil Beaton described, 'his grotesque little games', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era - glamorous, hard-edged, cleverly spiced with vulgarity... rich with implied narratives and

strong erotic undercurrents'

Biography of the Prophets - Ibn Kathir 2019-04-29

Although there are many better biographies about Prophets (peace be upon them), they are not completely accurate. Who were the eyewitnesses to such events? Or did the authors purposely misled the readers to present a negative view of Islam and the Prophets (peace and blessings be upon them). If you want an accurate history of Islam, read Ibn Kathir. He wrote over 48 books and over 60,000 pages. He lived in a time when people feared Allah far more and died in a righteous state. Prophet Muhammad (peace be upon him) was sent as a mercy NOT only to Mankind but to all the creations, and this includes all animals. His teachings further preserved the sanctity of animals and reinforced how people must honor and respect all of God's creation. Before you step on ant or harm a cat or dog, memorize the following Hadith: Allah's Messenger (peace and blessings be upon him) said: "An ant had bitten Prophet Uzair (peace be upon him), one of the Prophets sent to the Children of Israel. So he ordered that the colony of the ants be burnt. Then Allah revealed to him: "Because of an ant's bite you have burnt a community from amongst the communities which sings My Glory." And We have not sent you, [O Muhammad], except as a mercy to the worlds.

Edina - Lois J. Wetzel 2013-05

This is the fascinating tale of how a modern day mystic was contacted by 12-Dimensional Starbeings from Sirius-B to bring to the Earth a new form of energy medicine. These Beings call themselves "The Ankenash, Healing Corps of the Ashtar Command, Sirius-B." The purpose for this energy medicine is to assist humanity with the ascension process so that we can ultimately

inhabit our rainbow bodies. This healing technique therefore works directly upon the Lightbody, the effect of which then filters down to the physical body. EDINA, which stands for Energy Dynamics for the Integration of Natural Attributes, utilizes techniques lost after the High Period of Atlantis yet stored in various cultures over the globe in bits and pieces. EDINA energy medicine brings those pieces together into a cohesive whole, while adding new techniques never before seen on Earth. Finally, EDINA is a form of shamanism for the 21st Century and beyond. The book also teaches the reader how to actually practice this form of energy medicine without any further training, and gives further references at the end of the book.
