The Tech Entrepreneur's Financial Playbook - Evan Rogoff 2019-01-26

When an entrepreneur starts a business, his or her focus is on developing a product or service to sell to customers, and then on landing the initial customers. Off the radar for most entrepreneurs are mundane tasks relating to accounting, finance, governance and human resources. These tasks are often ignored by small companies that don't know what to do and are confused by complex requirements from various jurisdictions. Yet these roles are critical to every company large and small. Without back office tasks being performed regularly and accurately, a company will be swamped during due diligence from an investor or acquirer. Or a surprise state tax audit could turn ugly. Also, management won't understand how the company is performing or how much capital is available to reinvest in growth. But these responsibilities can be addressed simply and at a

low cost in any small technology business. Built on three decades of entrepreneurship and honed by experience working with dozens of entrepreneurs, this text guides entrepreneurs on best practices for the necessary back office functions of a technology business. This text includes steps to effectively implement simple procedures so that finance and administration doesn't impede the company's growth or valuation.

[Process Improvement for Effective Budgeting and Financial Reporting](#) - Nils H. Rasmussen 2003-06-17

"The budget and financial reporting processes are well known sources of frustration for most CFOs. Seeking a quick fix to the problem, the common solution is to pour more money into new and better software. This leaves the root cause, the inefficient and dysfunctional underlying processes and routines, unaddressed. As this book shows, substantial and sustainable improvements are only achieved through an holistic approach to process improvement, technology, strategy, and people."

—Tom Henry Knudsen, Executive Vice President, Telenor EiendomFornebu AS, Proven methods for improving efficiency Corporations face a high turnover among financial managers, rapid changes in technology, lack of time and process redesign skills, and ongoing ambiguity about primary objectives behind the budgeting and financial reporting processes. Amid this frenzy, it is the fundamental efficiency of these processes that dramatically impact overall business performance. Process Improvement for Effective Budgeting and Financial Reporting provides financial managers with a compelling blueprint for increasing efficiency and eliminating waste of time and energy. Four operational experts layout an 80/20 plan—improving 80% of processes in 20% of the time it would take to improve 100%—and explain a Business Process Improvement (BPI) plan that incorporates: The emerging trends affecting financial managers today Step-by-step process implementation Interviews with industry leaders, consultants, and managers who have successfully instituted BPI plans Appraisals of the available software that can help or hinder the process There is no substitute for improved efficiency. CFOs, controllers, budget managers,

and financial analysts will significantly benefit from adding this authoritative guide to their professional libraries.
