Gowers Review of Intellectual Property - Andrew Gowers 2006-12-06
This report examines the importance of intellectual property (IP), ranging from patents, copyright, design and trade marks, and whether in the age of globalization, digitization and increasing economic specialization it still creates incentives for innovation, without unduly limiting access to consumers and stifling further innovation. The report does recommend a radical overhaul of the system, with the review concentrating on three areas, and setting out the following recommendations: (i) strengthening enforcement of IP rights, whether through clamping down on piracy or trade in counterfeit goods; (ii) reducing costs of registering and litigating IP rights for businesses large and small; (iii) improving the balance and flexibility of IP rights to allow individuals, businesses and institutions to use content in ways consistent with the digital age.

Stuttering Severity Instrument - Glyndon D. Riley 2009-01-01
SSI-4: stuttering Severity instrument - Fourth Edition is a reliable and valid norm-referenced stuttering assessment that can be used for both clinical and search purposes. It measures stuttering severity in both children and adults in the four areas of speech behavior: (1) frequency, (2) duration, (3) physical concomitants, and (4) naturalness of the individual's speech. Frequency is expressed in percent syllables stuttered and converted to scale scores of 2-18. Duration is timed to the nearest one tenth of a second and converted to scale scores of 2-18. The four types of Physical Concomitants are and converted to scale scores of 0-20. The SSI-4 can also be used in conjunction with the stuttering prediction instruments for Young Children (SPI). SSI-4 was normed on a sample of 72 preschool-aged children, 139 school-aged children, and 60 adults. It has four components, each of which is used to assess and monitor the stuttering severity in both children and adults for clinical and research use: (1) Examiner's Manual and Picture Plates, (2) Test Record and Frequency Computation Forms, (3) Subjective stuttering Scales, and (4) Computerized Scoring of stuttering Severity (Software Version 2.0). The Computerized Scoring of the stuttering Severity (Version 2; CSSS-2.0) software is provided to facilitate the calculation of frequency and duration. The CSSS-2.0 automatically produces a

record of the percentage of syllables stuttered (frequency) and the duration of the three longest stuttering events. Minimum System Requirements: IBM PC or compatible Windows 2000(SP4)/2003/XP/Vista Processor: 600 MHz Pentium III;equivalent or higher 1.45 MB hard disk space External mouse and keyboard recommended (for scoring accuracy) CD-ROM drive Complete SSI-4 (c2009) Kit Includes: Examiner's Manual and Picture Plates 50 Test Record and Frequency Computation Forms CSSS 2.0

Blueprint for Black Power - Amos N. Wilson 1998 Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biologial destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).

Stuttering: Foundations and Clinical Applications, Global Edition - Ehud H. Yairi 2015-02-27 A balanced, current, and comprehensive presentation of the science of stuttering. The First Edition of Stuttering: Foundations and Clinical Applications presented the most comprehensive, complete presentation of the science and treatment of stuttering available in a single text–how stuttering is explained, and how stuttering is treated. The text is unique in its

coverage of the stuttering population, its in-depth look at stuttering therapy at various ages, and its original approach that invites students to offer critical appraisals of differing theoretical viewpoints. The new 2nd Edition has been revamped editorially to ensure ease of readability. It highlights sections with the latest scientific knowledge of stuttering regarding incidence and prevalence, onset natural recovery, and genetics; includes completely revised sections on brain anatomy and physiology, motor aspects, and cluttering; and updates the material with new case studies, tables and figures, and a new outline format for treatment procedures. Before the Scandal - Suzanne Enoch 2009-10-06 It Was a Scandal Waiting to Happen . . . Colonel Phineas Bromley is a legend—on the battlefield and in the bedroom. Though he's won many wars, and even more hearts, nothing could prepare him for his new life. When Phin discovers that someone has been pushing his

family toward ruin, he assumes the role of a legendary highwayman. Riding out in the middle of the night, hidden behind a mask, Phin heads straight into trouble . . . and into the arms of the ravishing girl next door. Coming face-to-face with a masked man did not frighten Alyse Donnelly as it should have. Instead, she finds him rather dashing. But her foolish heart has led her into trouble before, and helping a fugitive may mean jeopardizing her own plans, no matter how enticing his kisses. Now, as the danger grows, Alyse must make a choice between freedom . . . and the chance for true love.

Creative Approaches to Problem Solving - Scott G. Isaksen 2010-01-20
Creative Approaches to Problem Solving (CAPS) is a comprehensive text covering the well-known, cited, and used system for problem solving and creativity known as Creative Problem Solving (CPS). CPS is a flexible system

used to help individuals and groups solve problems, manage change, and deliver innovation. It provides a framework, language, guidelines, and set of easy-to-use tools for understanding challenges, generating ideas and transforming promising ideas into action. Features and Benefits: - Specific objectives in each chapter for the reader - This provides a clear focus for instruction or independent learning - Practical case study introduced in the beginning of each chapter and then completed as a "rest of the story" toward the end of the chapter - This feature provides an application anchor for the reader - Upgraded mix of graphics - These updated and refreshed graphics include tables, figures, and illustrative images that are designed to provide "pictures" to go along with the word. The aim has been to aid attention, retention, and practical application - Enhanced emphasis on flexible, dynamic process-- Enables users to select and apply CPS tools, components, and stages in a meaningful way that meets their actual needs - A framework for problem solving that has been tested and applied across ages, settings, and cultures-- Readers can apply a common approach to process across many traditional "boundaries" that have limited effectives. Creative Approaches to Problem Solving has been (and continues to be) used as a core text for faculty who are teaching courses in Creative Problem Solving or Creativity and Innovation as part of an MBA program, or in Education, a course on Creativity (often as a component of certification or endorsement requirements in gifted education). It is also used as a core text for those enrolled in professional development, continuing education, or executive education programmes.

Stuttering - Edward G. Conture 2001

This highly readable, clinically oriented book combines theory and therapy and examines all facets of stuttering, from possible etiologies through assessment to treatment. While considerable uncertainty still exists regarding the precise cause(s) of stuttering, Conture provides the reader with an even-handed coverage of fundamental knowledge, methodology, and procedures for effectively dealing with stuttering in children, teenagers, and adults. The book goes beyond a "how to" manual. Rather, Conture's clinical handbook provides both students and clinicians a source for principle-based procedures and strategies for the management of stuttering. Focusing on people who stutter as people first and people who stutter second, the material covers assessment and management of stuttering within the realities of everyday living, concomitant speech and language problems and clinical practice. For those in the fields of communication science and disorders and speech pathology.

Linguistic Inquiry and Word Count - James W. Pennebaker 1999-04-01
Language, whether spoken or written, is an important window into people's emotional and cognitive worlds. Text analysis of these narratives, focusing on specific words or classes of words, has been used in numerous research studies including studies of emotional, cognitive, structural, and process components of individuals' verbal and written language. It was in this research context that the LIWC program was developed. The program analyzes text files on a word-by-word basis, calculating percentage words that match each of several language dimensions. Its output is a text file that can be opened in any of a variety of applications, including word processors and spreadsheet programs. The program has 68 pre-set dimensions (output variables) including linguistic dimensions, word categories tapping psychological constructs, and personal concern categories, and can accommodate user-defined dimensions as well. Easy to install and use, this software offers researchers in social, personality, clinical, and applied psychology a valuable tool for quantifying the rich but often slippery data provided in the form of personal narratives. The software comes complete on one 31/2 diskette and runs on any Windows-based computer.

Relating Events in Narrative - Ruth A. Berman 2013-06-17
This volume represents the culmination of an extensive research project that studied the development of linguistic form/function relations in narrative discourse. It is unique in the extent of data which it analyzes--more than 250 texts from children and adults speaking five different languages--and in its crosslinguistic, typological focus. It is the first book to address the issue of how the structural properties and rhetorical preferences of different native languages--English, German, Spanish, Hebrew, and Turkish--impinge on narrative abilities across different phases of development. The work of Berman and Slobin and their colleagues provides insight into the interplay between shared, possibly universal, patterns in the developing ability to create well-constructed, globally organized narratives among preschoolers from three years of age compared with school children and adults, contrasted against the impact of typological and rhetorical features of particular native languages on how speakers express these abilities in the process of "relating events in narrative." This volume also makes a special contribution to the field of language acquisition and development by providing detailed analyses of how linguistic forms come to be used in the service of narrative functions, such as the expression of temporal relations of simultaneity and retrospection, perspective-taking on events, and textual connectivity. To present this information, the authors prepared in-depth analyses of a wide range of linguistic systems,

including tense-aspect marking, passive and middle voice, locative and directional predications, connectivity markers, null subjects, and relative clause constructions. In contrast to most work in the field of language acquisition, this book focuses on developments in the use of these early forms in extended discourse--beyond the initial phase of early language development. The book offers a pioneering approach to the interactions between form and function in the development and use of language, from a typological linguistic perspective. The study is based on a large crosslinguistic corpus of narratives, elicited from preschool, school-age, and adult subjects. All of the narratives were elicited by the same picture storybook,Frog, Where Are You?, by Mercer Mayer. (An appendix lists related studies using the same storybook in 50 languages.) The findings illuminate both universal and language-specific patterns of development, providing new insights into questions of language and thought.

Human Services Management - David Austin 2002-11-18
Human services management occurs in nonprofit, governmental, and for-profit sectors and involves a wide variety of organizational structures. These diverse conditions shape the effort to produce and project services that directly affect the quality of life of individuals, families, and communities through social welfare, health and mental health, criminal justice, and educational services. David Austin begins with an examination of the historical development and distinctive characteristics of human service organizations, the variety of organizational and program structures at play, and the connection of individual service organizations with service delivery networks. He then examines of the roles and responsibilities of key stakeholder constituencies, including service users, service personnel (especially service professionals), funders, executives, and policy boards. The final two chapters discuss two organizational processes: accountability for effectiveness and dealing with organizational changes.

Child Development at the Intersection of Emotion and Cognition - Susan D. Calkins 2010
Developmental theorists have long speculated that emotion and cognition are inseparable components of the developmental process. Some even suggest that the two components are fully integrated by school age. Yet, despite considerable theoretical work describing this interaction, relatively little empirical work has been conducted on the subject. This volume addresses the codevelopment of emotional and cognitive processes by integrating theoretical and empirical work on these processes. The first part of the book demonstrates the codependence of emotional and cognitive processes, noting that both processes are clearly necessary for successful regulation of thought and behavior and that children with early adjustment difficulties often have deficits in both types of processing. The second part considers possible neurological and genetic mechanisms for the emotion-cognition link. Finally, the last part explores implications for clinical and educational research, highlighting atypical emotional and cognitive processing and its effect on adjustment in academic and social settings.

Multilingual Aspects of Fluency Disorders - Peter Howell 2011-05-11
This book contains contributions by scholars working on diverse aspects of speech who bring their findings to bear on the practical issue of how to treat stuttering in different language groups and in multilingual speakers. The book considers classic issues in speech production research, as well as whether regions of the brain that are affected in people who stutter relate to areas used intensively in fluent bilingual speech. It then reviews how formal language properties and differential use of parts of language affect stuttering in English, and then compares these findings to work on stuttering in a variety of languages. Finally, the book addresses methodological issues to do with studies on bilingualism and stuttering; and discusses which approach is appropriate in the treatment of bilingual and multilingual people who stutter.

Enterprise Service Oriented Architectures - James McGovern 2010-11-19
Conventional wisdom of the "software stack" approach to building applications may no longer be relevant. Enterprises are pursuing new ways of organizing systems and processes to become service oriented and event-driven. Leveraging existing infrastructural investments is a critical aspect to the success of companies both large and small. Enterprises have to adapt their systems to support frequent technological changes, mergers and acquisitions. Furthermore, in a growing global market, these systems are being called upon to be used by external business partners. Technology is often difficult, costly and complex and without modern approaches can prevent the enterprise from becoming agile. Enterprise Service Oriented Architectures helps readers solve this challenge in making different applications communicate in a loosely coupled manner. This classic handbook leverages the experiences of thought leaders functioning in multiple industry verticals and provides a wealth of knowledge for creating the agile enterprise. In this book, you will learn: • How to balance the delivery of immediate business value while creating long-term strategic capability • Fundamental principles of a service-oriented architecture (find, bind and execute) • The four aspects of SOA (Production, Consumption, Management and Provisioning) • How to recognize critical success factors to implementing enterprise SOAs • Architectural importance of service registries, interfaces and contracts • Why improper service decomposition can hurt you later rather than sooner • How application design and integration practices

change as architects seek to implement the "agile" enterprise About the Authors James McGovern is an enterprise architect for The Hartford. He is an industry thought leader and co-author of the bestselling book: A Practical Guide to Enterprise Architecture. Oliver Sims is a recognized leader in the architecture, design and implementation of service-oriented and component-based enterprise systems. He was a founding member of the OMG Architecture Board. He was co-author of the groundbreaking book: Business Component Factory. Ashish Jain is a Principal Architect with Ping Identity Corporation, a leading provider of solutions for identity federation. Prior to joining Ping Identity, he worked with BEA Systems where his role was to assist BEA customers in designing and implementing their e-business strategies using solutions based on J2EE. He holds several industry certifications from SUN and BEA and is also a board member for the Denver BEA User group. Mark Little is Director of Standards and SOA Manager for JBoss Inc. Prior to this, he was Chief Architect for Arjuna Technologies Ltd and a Distinguished Engineer at Hewlett-Packard. As well as being an active member of the OMG, JCP, OASIS and W3C, he is an author on many SOA and Web Services standards. He also led the development of the world's first standards-compliant Web Services Transaction product.

Grimoire for the Apprentice Wizard - Oberon Zell-Ravenheart 2004-02-04
With contributions and additional material from Raymond Buckland, Raven Grimassi, Patricia Telesco, Morning Glory Zell-Ravenheart, and other illustrious members of The Grey Council, here is the book Merlin would have given a young Arthur...if only it had existed. This essential handbook contains everything an aspiring Wizard needs to know. It is profusely illustrated with original art by Oberon and friends, as well as many woodcuts from medieval and alchemical manuscripts—plus charts, tables, and diagrams. It also contains: Biographies of famous Wizards in history and legend; Descriptions of magickal tools and regalia (with full instructions for making them); spells and workings for a better life; rites and rituals for special occasions; a bestiary of mythical creatures; systems of divination; the Laws of Magick; myths and stories of gods and heroes;

lore and legends of the stars and constellations; instructions for performing amazing illusions, special effects, and many other wonders of the magickal multiverse. To those who study the occult, in particular, Witchcraft, the name of Oberon Zell-Ravenheart is internationally-known and respected. He is a genuine Wizard, and he has written this book for any person wishing to become one. Perhaps, as some have written, Oberon Zell-Ravenheart is the real Albus Dumbledore to aspiring Harry Potters! In addition to his own writings in this collection, he also presents other writers who add some highly thoughtful insights. Such as Raymond Buckland, among others. The illustrations and photographs which accompany the text are among the finest found anywhere, and are a helpful boon to those wanting to see what they are reading about. Biographies of many famous Wizards of history and legend appear in the book. Detailed descriptions of magickal tools with information for making them appears in this book. Additional information includes rites and rituals for special occasions, a bestiary of mythical creatures, a detailed and educational discussion on the laws of magick, myths, and lore of the stars and constellations. This book is full of instructions! As a handbook and guide for becoming a Wizard, this is as near perfect and honest a book as one will find today. New Page Books has done a great service to the paranormal and occult community readers by publishing this worthwhile reference book. Oberon Zell-Ravenheart has written a classic on Wizardry. This is his masterpiece. One of the American pioneers of Paganism in the United States, his lifetime of learning and information is shared with readers from all walks of life. He started in 1968 with the publication of his award-winning journal, Green Egg, and is often considered by readers as one of their favorite Pagan writers. The lessons in this fine book are accurate, honest, and entertaining. If you want to become a Wizard, this is the book to start with, and learn from. Radar Instruction Manual - United States. Maritime Administration 2005
Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J.
